## **HANSATON launches rechargeable behind-the-ear hearing system with powerful lithium-ion batteries.**

The Hamburg-based hearing system manufacturer HANSATON has added the new behind-the-ear AQ jam SHD to its portfolio of rechargeable hearing systems.

## HANSATON launches rechargeable behind-the-ear hearing system with powerful lithium-ion batteries.

**Hamburg, June 11, 2018:** With the introduction of the AQ *jam SHD* with lithium-ion batteries, the Hamburg-based hearing system manufacturer HANSATON is adding a behind-the-ear model to its portfolio of rechargeable hearing systems with SHD technology.

Like the AQ *sound SHD*, a rechargeable RIC hearing system released in Spring 2017, HANSATON's AQ *jam SHD* behind-the-ear model has a lithium-ion battery designed to guarantee hearing system users 24 hours of battery runtime\* and optimum sound quality. As Daniel Maas, Business Director HANSATON Sales Germany, puts it: "Over the past twenty-plus years, HANSATON has compiled a wealth of expertise and experience in the area of rechargeable battery technology. We are so convinced of the merits of our AQ SHD series models that we are offering our German customers a five-year warranty on their lithium-ion batteries—as an extra promise of quality, so to speak. And now, for the first time," he adds, "the AQ SHD series is also available in Performance Level 3, or Economy Class. So, depending on what our hearing system customers want and need, they have their choice of systems in Performance Levels 3, 5, 7, or 9."

As with other rechargeable battery-powered external receiver systems, the behind-the-ear model is a durable, plasma-coated system that meets the high standards of IP68 certification. Both models in the rechargeable AQ SHD series are available in eight color combinations and have charging accessories available. The white *Comfort Charger* base station protects and dries the hearing systems while charging them at the same time. Users who find themselves with no plugs available can equip their *Comfort Charger* stations with a mobile *Comfort Power Pack* charging solution that provides enough power for an additional seven charging cycles. The compact *Light Charger* is also available as a workplace solution.

The rechargeable HANSATON AQ *jam SHD* hearing system with clever charging accessories:

Comfort Charger

Comfort Power Pack

Light Charger +  
Light Charger Base

\*Expected running time of 24 hours when fully charged, including 80 minutes of wireless streaming

## About HANSATON

Hearing system provider HANSATON based in Hamburg was founded in 1957 and has been part of the Sonova Group since 2015. Within the hearing system industry, HANSATON stands for innovative technologies and award-winning product design. Together with hearing system professionals and partners, HANSATON develops custom-tailored solutions to help people achieve an optimal hearing experience. HANSATON hearing systems are available in more than 70 countries worldwide.
